Profile

Highly motivated Computer Science graduate with First Class Honors (GPA 3.84) and diverse experience in full-stack development. Eager to leverage strong technical and problem-solving skills in software development to contribute to innovative projects.

Education

Rangsit University — Pathum Thani, Thailand
Bachelor of Science in Computer Science with First Class Honors. GPA: 3.84 — Graduation Date: May 2025

Relevant Coursework: OOP, System Analysis, Computer Architecture, Software Engineering, Data Analysis, Machine Learning, Data Structures and Algorithms, Database System, IOT, Programming Languages, Artificial Intelligence

Experience

SIAM SMILE INSURANCE PUBLIC CO,.Ltd — Bangkok, Thailand
Intern Full Stack Developer — August 2024 – December 2024

- Developed full-stack web applications (frontend and backend).
- Collaborated with team members while adhering to strict coding and project standards.

SIAM SMILE INSURANCE PUBLIC CO,.Ltd — Bangkok, Thailand
Full Stack Developer — July 2025 – Present

- Developed full-stack web applications (frontend and backend).
- Maintained existing systems and implemented new features.

Project

Customer Portal | *Line LIFF, React*

- Engineered an external customer portal integrated with LINE LIFF, enabling clients to seamlessly manage and update their personal profiles and policy information.

Branch Service | *C# .Net, React*

- Co-developed an all-in-one Branch Service platform, empowering field agents to conduct off-site operations and transactions completely within a single, unified system.

Underwrite Branch | *MVC*

- Contributed to the development of an automated insured member screening system to streamline underwriting risk assessment.

Assessment Branch | *C# .Net, React*

- Developed a comprehensive branch appraisal system designed to evaluate, track, and standardize the physical image, quality compliance, and operational standards of physical branch locations.

Assessment Zebra | *C# .Net, React*

- Engineered a specialized vehicle inspection utility tailored for the "Zebra Car" automotive fleet, transforming manual field inspection procedures into a digitized, structured workflow.

Technical Skills

Languages:

- C#, JavaScript, TypeScript, Java, SQL

Frameworks:

- .NET, React, Next.js, Express, NestJS

Tools:

- Git, Docker

Interests

- Systems programming with Rust or Go
- CI/CD (Continuous Integration/Continuous Deployment)
